# Luis Eduardo Melo

## Full-Stack Software Engineer

luismelo93@hotmail.com | +1 829 605 6147 | Santo Domingo, Dominican Republic | mmle-porfolio.vercel.app
luis-eduardo-melo-marcial-8a21b6156 | github.com/mmle10/

## EDUCATION

**Universidad Dominicana O&M**
Systems Engineering
*2012 — 2020*

**Gustavo Adolfo Bécquer**
School Diploma in Accounting
*2002 — 2011*

## LANGUAGES

**Spanish**
*Native*

**English**
*Fluent / Professional Working Proficiency*

## SKILLS

**Languages**
TypeScript | JavaScript | HTML | CSS | SQL

**Frontend**
React.js | Next.js | Tailwind CSS | Redux | TanStack Query | Responsive Design | Three.js

**Backend**
Node.js | NestJS | Google OAuth | Authentication & Authorization (RBAC) | RESTful APIs | WebSockets | Socket.IO

**Databases & AI**
PostgreSQL | MongoDB | Supabase | Appwrite | LLM API Integrations

**Tools, Cloud & Practices**
Firebase | Jira | Agile Scrum | CI/CD | Docker | Vercel | Render | Azure DevOps | Git | GitLab | GitKraken | VS Code | Postman | Capacitor

Full-Stack Software Engineer experienced in team-based development and building client applications from scratch. Founder of Codium and creator of AutoAgenda, an automotive SaaS platform with payments, real-time updates, and mobile apps. Skilled in TypeScript, React, Next.js, Node.js, and NestJS, delivering solutions from requirements to deployment.

## EXPERIENCE

### Grupo Read
Software Developer
*06/2024 — 11/2025* — *Santo Domingo, Dominican Republic*

- Developed and maintained a healthcare appointment platform using React.js, Next.js, and TypeScript, with responsive interfaces and reusable components styled with Tailwind CSS.
- Implemented appointment scheduling, cancellations, multi-location availability, interactive maps, and automated notifications for patients and healthcare professionals.
- Built backend services and RESTful APIs using Node.js and MongoDB, implementing business logic, authentication, and role-based access control (RBAC).
- Troubleshot production issues and collaborated with development and QA teams on code reviews, deployments, and CI/CD workflows in an Agile Scrum environment.
- Tools: Docker, Git, GitKraken, Jira.

### Codika, SRL
Software Developer
*01/2021 — 06/2023* — *Santo Domingo, Dominican Republic*

- Developed web applications for automotive and security clients using React.js, JavaScript, TypeScript, Tailwind CSS, Node.js, and MongoDB.
- Built automotive booking features, including customer dashboards, appointment scheduling, vehicle management, role-based access, and service provider notifications.
- Developed security operations features for personnel assignments, location management, vehicle fleets, and role-based permissions.
- Integrated RESTful APIs and collaborated with cross-functional teams through code versioning, sprint planning, and daily stand-ups in an Agile Scrum environment.
- Tools: Git, Jira, Azure DevOps

### Codium
Founder & Full-Stack Developer
*03/2026 — Present* — *Santo Domingo, Dominican Republic*
*Custom Software Development | www.codiumservices.com*

- Built custom web applications from scratch for billing, hospitality, QR-based security, and jewelry retail.
- Developed frontend interfaces, backend services, databases, and API integrations.

**AutoAgenda Integrations**

CardNET | Lemon Squeezy | Mapbox | Cloudinary | Firebase Cloud Messaging

**Project Type**

Personal SaaS Product

**Role**

Creator & Full-Stack Developer

**Platforms**

Web | Android | iOS

- Translated client requirements into complete software solutions.

## PROJECTS

### AutoAgenda

Next.js, React, TypeScript, Node.js, NestJS, MongoDB, REST APIs, WebSockets, Socket.IO, Google OAuth, Firebase, maps, cloud media services, Docker, Vercel, Render, Capacitor

• Designed and built a SaaS platform connecting vehicle owners with repair shops through interactive maps, appointment booking, service tracking, and spare parts purchases.
• Developed a Next.js, React, and TypeScript frontend with NestJS/Node.js REST APIs and MongoDB, supporting role-based workflows for customers and workshop staff.
• Integrated CardNET payments and Lemon Squeezy subscriptions, including payment workflows and webhooks.
• Implemented real-time messaging and service updates with WebSockets and Socket.IO, plus mobile push notifications through Firebase Cloud Messaging.
• Built Android and iOS applications with Capacitor; integrated Google OAuth and Cloudinary, used Docker for containerized development, and deployed across Vercel and Render.
